The Path of Hot Air Through the Circulator

Vertical tubes in the firebox increase the steel heating surface area by approximately 50%. This will create a natural hot air draft inside the tube and will draw cool air off the floor. The hot air produced by convection will constantly circulate through your house with no electrical blowers or fans, meaning even heat through your home.

The Path of Hot Air

Through the Circulator

Heat Out

Cool Air In

Heat your home without electricity or a fan

Since 1980, DS, a family owned business in Lancaster Pennsylvania has made sincere efforts to have the most competitive and the highest quality product available and it shows in the product they manufacture.

Traditional craftsmanship defines each product from wood and coal furnaces to custom metal fabrication. With a goal of high efficiency and low maintenance, along with superior quality, DS products are built to last a lifetime.

With four divisions, Stove Manufacturing, Retail, Wholesale, and Custom/Production Fabrication, DS strives for excellence in everything they produce.

The Powerhouse of Stoves

The DS Circulator will burn for up to two days. Known for its slow burning, the coal hopper is gravity-fed, using no electricity. The DS Regulator controls drafts. With four different sizes available, you can heat individual rooms or your whole house.

FEATURES:
- Burns coal
- Heats up to 1200 to 2500 sq. ft. depending on model
- Heat exchanger tubes through firebox for natural circulation
- Built from heavy plate steel
- Superior cast iron Shaker grates
- Cast iron airtight doors
- Preset secondary combustion
- Bi-metal draft regulator
- Extended burn time with heating output
- Gravity fed coal hopper - holds 50 lbs
- Burn time 24-48 hours
- Exterior Shaker handles
- Minimal dust
- Made in the USA

THE DS REGULATOR
The DS Regulator is not electrical. It uses two different metals bonded together. The metals expand and contract based on temperature, directing the heat to where it is needed. Mounted directly on the hot surface of the stove, it governs the temperature by opening or closing the draft control. This draft control connects to a specially designed draft intake, through which air can enter to increase or decrease the temperature of the fire, depending on the heat radiated from the stove. The DS Regulator is equipped with a 5-position mechanical control dial.

CLEARANCE FROM COMBUSTIBLES

- Side: 24”
- Back: 24”
- Front: 48”
- Flue/Stove pipe: 18”
- Ceiling: 54”

All units require a class “A” all fuel chimney installation that must conform to local and state codes.

*Safety tested to U.L. #1482 for coal use only

Manufactured by DS Stoves, Gordonville, PA  (717) 768-3853
