- 24 - 48 Hour Burn Time
- Removable Hopper
- Airtight Cast Iron Doors
- Superior Cast Iron Shaker Grates
- Exterior Shaker Handle
- Minimal Dust
- Constructed From Heavy Plate Steel
- Manufactured In Lancaster County, PA

DS HOT AIR DRAFT REGULATOR

The DS Regulator is not electrical. It uses two different metals bonded together. The metals expand and contract based on temperature, directing the heat to where it is needed. Mounted directly on the hot surface of the stove, it governs the temperature by opening or closing the draft control. This draft control connects to a specially designed draft intake through which air can enter to increase or decrease the temperature of the fire. The DS Regulator is equipped with a 5-position mechanical control dial.
