The Crown
Of Comfort

Where Tradition, Craftsmanship, and Quality Come First

Trust The King Of Furnaces

THE DS HOT AIR CIRCULATOR SYSTEM

Vertical tubes in the firebox increase the heating surface area by approximately 50%. Heat rises inside the tubes, drawing cooler air from the floor. This convection process produces circulation with no need for electrical blowers or fans, meaning even heat throughout your home. The Kozy-King's convection process adds to the effectiveness of the 3 speed blower. It also allows the Kozy-King to be used in the event of power loss with some minor modifications (See Owner's Manual).

FEATURES

- Burns Anthracite
- Hot Air Furnace
- Reburn System
- 80 / 20 Combustion Bypass
- DS Circulator Tubes Throughout Firebox
- Airtight Cast Iron Doors
- Large Fire Door
- Superior Cast Iron Shaker Grates
- Exterior Shaker Handle
- Large Ash Pan
- Minimal Dust
- Thermostat Controlled
- 3 Speed Blower
- 18" x 18" Filter Box w/ Left or Right Inlet
- Clean Air Filter
- Forced Draft
- Safety Control w/ Fan Limit Switch
- Domestic Hot Water Option
- Cast Iron Baffle
- Constructed From Heavy Plate Steel
- Manufactured In Lancaster County, PA

All units require a Class "A" all fuel chimney. Installation must conform to state and local codes.

Our goal is to serve your needs with a very efficient, clean burning furnace. The Kozy-King's reburn system and heat exchanger provide maximum efficiency with less fuel. This U.L. Tested anthracite burning furnace is thermostat controlled for even temperature. The Kozy-King comes with a 3-speed blower and a safety features to prevent overheating. The outside cabinet is insulated to minimize heat loss. You can use this unit independently or in conjunction with another furnace. The Kozy-King will heat your whole home, shop, or greenhouse.
